

Hello there,

My name's Nic, and I wanted to write you a quick note about using Educake with your year 11 child.

I know that year 11 can be a lot for young people to deal with, especially with GCSEs ahead. It's also tough on families. If school was hard for you, or if life is busy and stressful right now, you're definitely not alone.

That's why we made Educake.

Educake is a simple tool that helps your child do quick homework and revision, so they can build confidence without needing loads of support at home. They can do short quizzes on their phone or computer. It helps them understand what they know and what they need to practise more, without overwhelming them.

My own kids didn't always love schoolwork, but using Educake helped them stay on track and feel more confident, even when they didn't have anyone hovering over them. Many students find that Educake helps them feel less stressed and more confident.

Thank you for taking a moment to read this. We believe in your child, and we want to help them succeed in their future. Whatever their path looks like, Educake can help them feel more confident along the way.

Yours sincerely,

Nicola Allen

Managing Director

Educake
